

SUPPLIES AND EQUIPMENT

Criteria for Supply Items:

A supply item is any article or material which meets any one or more of the following conditions:

1. It is consumed in use.
2. It loses its original shape or appearance with use.
3. It is expendable; that is, if the article is damaged or some of its parts are lost or worn out, it is usually more feasible to replace it with an entirely new unit rather than repair it.
4. It is an inexpensive item, having characteristics of equipment, but whose small unit cost makes it inadvisable to capitalize the item.
5. It loses its identity through incorporation into a different or more complex unit or substance.

A. List of Supplies:

The following list of supplies is not intended to be complete. While the list of supplies is rather extensive, it is not practical, even if it were possible, to make it complete. If a specific item cannot be found in the list, it is suggested that a similar item be located to serve as a guide. In cases of doubt as to whether an article should be classified as a supply, the issue should be resolved in terms of the criteria. In looking for a supply item with a descriptive word or modifier (glass cutter) in the nomenclature, search under the first letter of the first word first and under the first letter of the second word second. The multiple worded nomenclatures are not cross-referenced in every instance.
