

**Legislative Audit Follow-up Information on County Expenditures
For the County Government Interim Committee**

September 16, 2015

Introduction

During Legislative Audit's presentation to the County Government Interim Committee on August 19, 2015, the Committee asked whether Legislative Audit could provide the committee additional information on which county government expenditures are required by the State constitution or laws and which are discretionary. The remaining information in this document provides the results of our efforts in answering this question.

The uniform accounting manual prepared by Legislative Audit and in use by all South Dakota counties specifies accounts to be used for recording expenditures related to each of the government functions performed by counties. We reviewed each of these expenditure accounts and attempted to find constitutional or statutory authority for such expenditures. As a result of this effort, we developed the following classifications for the authority related to county expenditures:

- Statutorily required – expenditures for functions that are specifically required to be performed by counties by state law.
- Statutorily authorized – expenditures for functions that state law authorizes but does not require counties to perform.
- No specific authority – expenditures for functions that have no associated specific constitutional or statutory authority. However, these expenditure accounts relate to functions that counties are either required or authorized to perform.
- Debt Service – expenditures by counties in servicing outstanding indebtedness. Although the constitution requires that counties provide funds to repay indebtedness, it does not require that a county incur debt. For this reason and because these expenditures may relate to any governmental function, we have classified these expenditures separately.
- Capital Outlay – expenditures by counties for capital purposes. Only counties issuing financial statements reported in conformity with generally accepted accounting principles use this classification. These expenditures may relate to any governmental function and so have been separately classified.

We did not find any constitutionally required functions for counties other than the requirement to provide for the repayment of indebtedness.

Exhibits

The following exhibits contain additional details on how we classified expenditures and a summary of expenditures for the four year period CY2011 thru CY2014 using the classifications described above. The financial data in these exhibits is for the same population of 64 of 66 counties used in the documents we provided at the Committee's first meeting.

- Exhibit A on page 3 provides a pie chart of expenditures by authority classification for all governmental funds for CY2011-C2014 with a table below the chart identifying the amount of expenditures for each classification.
- Exhibit B on page 4 provides a pie chart of expenditures by authority classification for only the General Fund for CY2011-CY2014 with a table below the chart identifying the amount of expenditures for each classification. This pie chart includes a slice for transfers out because they represent a significant use of county general funds which ultimately result in expenditures in the funds receiving the transfers. Transfers out of the General Fund support various county governmental functions.
- Exhibit C on page 5 contains a table which identifies each expenditure function, the authority classification we assigned to each function and the related statutory reference(s) we used in assigning our classification.
- Exhibit D on page 15 contains a worksheet which reports the total expenditures for each county for the four year period CY2011-CY2014 by function. At the bottom of the worksheet, we have summarized each county's expenditures by the authority classifications we assigned.

We hope you find this additional information useful. We would be happy to answer any questions or provide additional follow-up information for the Committee.
